

Hello, we are the students of Southern University of Science and Technology (SUSTech), the job we need you to do is:

Get the final exams(spring-2023) and the answers(spring-2023) from school's educational administration system or teacher's computer. Our school's DHCP server is 172.18.19.31, and you can try to hack the URL "https://tis.sustech.edu.cn/session/invalid", this is our school's educational administration system (we suppose that maybe the exam papers will be collected by the educational administration, so maybe you can try this way). The targets (teachers' information) are list in the table bellow, they are all work in the Southern University of Science and Technology (SUSTech) which location in Shenzhen China. The exams and answers must be .pdf/.docx/.doc format so you just need to search these three format files if you use hacking teachers' computers. And the name of files may in English or Chinese (in Chinese, the final exam will be shown as “期末试卷、期末考试”, and answers will be shown as “答案、参考答案、期末答案”), if you don't sure which are final exams, you can open suspicious files to check the content, or list all of the file names to me, I will tell you which we need to download.

This work is very important for us, please do it quick and accurate as well as you can do, thank you very much, best wishes! And if you have any results or questions or requires on the prize, you can connect me with market message function or email to mingzhudashuai@proton.me, I will check message everyday, thanks a lot, best wishes!

However, since we were subjected to hacker fraud before, we have spent all of our bitcoin. At present, if we cannot produce the finished product (the answer to the final examination paper), I have no way to ask my parents for money. Therefore, I kindly ask your team to do it for us first and pay the money afterwards. Besides, you are professional hackers, we will not default on the debt, as long as the test papers and answers are send to my email, we will pay for it at the first time. I hope you can think about it. Thank you very much.
